RE: Docket No. AB-55 (Sub-No. 664X), *CSX Transportation, Inc.– Abandonment Exemption–in Anderson County, SC*

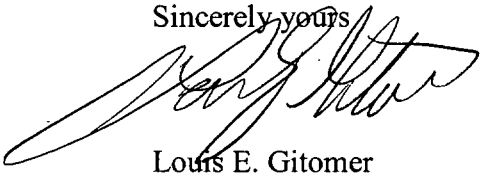
Dear Secretary Williams:

Enclosed are the original and 10 copies of a Petition for Exemption for abandonment in the above-entitled proceeding and a check for the filing fee of $5,300. Also enclosed is a computer diskette containing the Petition.

Please time and date stamp the additional copy of this letter and the Petition and return them with our messenger. Thank you for your assistance.

If you have any questions please call or email me.

Sincerely yours,



Louis E. Gitomer
Attorney for: CSX Transportation, Inc.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Docket No. AB-55 (Sub-No. 664X)

CSX TRANSPORTATION, INC.–ABANDONMENT EXEMPTION–
IN ANDERSON COUNTY, SC

PETITION FOR EXEMPTION

CSX Transportation, Inc. ("CSXT") petitions the Surface Transportation Board ("Board") to exempt, under 49 U.S.C. § 10502, CSXT's abandonment of a 12.74-mile rail line between milepost AKL 26.26, near Belton, the end of the line, and milepost AKL 39.00, near Pelzer, on the Southern Region, Florence Division, Belton Subdivision, in Anderson County, SC (the "Line") from the prior approval requirements of 49 U.S.C. § 10903.

The abandonment is justified because the limited local traffic on the Line results in an annual loss of about $118,000 to CSXT. The Line requires an expenditure of over $900,000 to rehabilitate it to Federal Railroad Administration ("FRA") Class 1 condition. For over a year, CSXT has unsuccessfully explored and negotiated various options for transferring the Line by sale or lease to the Pickens Railway Company ("Pickens") instead of abandoning the Line.

PROPOSED TRANSACTION

CSXT proposes to abandon the 12.74-mile rail line between milepost AKL 26.26, near Belton, the end of the line, and milepost AKL 39.00, near Pelzer, on the Southern Region, Florence Division, Belton Subdivision, in Anderson County, SC. The Line traverses Zip Codes 29627 and 29654. The Belton Station is at milepost AKL 31.0.

A map of the Line is attached as Exhibit A. Exhibit B consists of the Environmental Report. The Historic Report is in Exhibit C. The draft Federal Register Notice is in Exhibit D. Copies of the newspaper publication and the required certification are in Exhibit E. Verified statements of Mr. Hunnicutt, Mr. Allen, and Ms. Preslar are in Exhibits F, G, and H, respectively. The certificate of service is in Exhibit I.

Based on information in CSXT's possession, the Line does not contain federally granted right-of-way. Any documentation in CSXT's possession concerning title will be made available to those requesting it.

BACKGROUND

The 12.74-mile line runs from a connection to CSXT's system near Pelzer, SC at the north to the end of the Line near Belton in the south. CSXT operates the Line as excepted track. At Belton Yard, about 2.14 miles north of the end of the Line, CSXT interchanges traffic with Pickens. The traffic that is interchanged with Pickens is overhead traffic on CSXT and can be rerouted over the Norfolk Southern Railway Company ("NS") from Spartanburg, SC for interchange to Pickens at Anderson, SC, instead of Belton Yard.

1. Pre-filing discussions with users of the Line.

CSXT met with Pickens, Belton Metals Company ("Metals"), and Belton Industries ("Industries") to explain that CSXT will propose to abandon the Line because of the low volume of local traffic and the large rehabilitation costs that must be incurred to bring the Line to FRA Class 1 standards. CSXT advised Metals and Industries of the availability of CSXT transload facilities in Greenville, SC. CSXT has also served a copy of this Petition on Pickens, Metals, and Industries. CSXT does not know whether Pickens, Metals, or Industries will oppose this

proposed abandonment. If there is opposition filed to this petition, CSXT will seek leave to respond expeditiously.

CSXT also met with Anderson County planning officials to discuss the future of the Line. In addition, CSXT described the offer of assistance process and advised them of the price for the Line and just the southern three miles of the Line.

More than one year ago, CSXT recognized that the traffic on the Line did not justify the cost of operations or rehabilitation of the Line. Instead of proceeding to abandon the Line, CSXT entered negotiations with Pickens to lease or sell the Line to Pickens. CSXT and Pickens were unable to agree on terms. Having tried to transfer the Line to a short line railroad by sale or lease and having been unsuccessful, CSXT must now seek to abandon the Line. It is CSXT's view that if a short line railroad decides that it will not acquire the Line by purchase or lease because it cannot operate the Line profitably, even with a *de minimus* lease payment, then CSXT cannot operate the Line profitably and must seek to abandon the Line. CSXT is willing to sell all or a portion of the Line for its net liquidation value.

CSXT has fully explored all of the options for the continued operation of the Line without success. Hence, CSXT is compelled to seek abandonment of the Line.

2. The traffic on the Line will not support the cost of rehabilitating the Line to FRA Class 1.

In 2005 the traffic originating or terminating on the Line declined to 87 carloads, continuing a pattern of declining local traffic on the Line. There are two shippers on the Line, Belton Metals Company ("Metals") located at milepost AKL 34.0, and Belton Industries ("Industries") located at milepost AKL 26.3. Metals originated 16 carloads of scrap metal on the

Line in 2005.[1] Industries received 70 carloads of Polypropylene and originated one outbound carload of Polypropylene. CSXT does not expect there to be sufficient growth in the local traffic to make the operation of the Line profitable. The local traffic generated revenues of $178,290 in 2005. Additional local revenue on the Line of $15,789 was generated by intra-plant switching and the lease of track space for storage by the shippers.

Considering only the volume of local traffic on the Line would have resulted in an avoidable loss of $118,717 in 2005. In making the Forecast Year analysis, CSXT has estimated that Metals' traffic would double because CSXT does not expect the switch track to be unusable. Even with 103 carloads, local traffic on the Line would only generate $215,868 in revenues and would result in an avoidable loss of $108, 013. Ms. Ellen M. Preslar has submitted a verified statement (See Exhibit H) and supporting work papers (See volume II) justifying the revenues and costs for the Line. For local traffic only, CSXT would incur (1) an avoidable loss of $118,717 in the Base Year, (2) an avoidable loss of $108,013 in the Forecast Year along with an opportunity cost of $43,188, and (3) an avoidable loss of $108,101 in the Subsidy Year, along with an opportunity cost of $43,188, and a rehabilitation cost of at least $915,960. Including overhead traffic, all of which can be rerouted, there would be (1) a gain of $124,868 in the Base Year, (2) a gain of $150,071 in the Forecast Year along with an opportunity cost of $44,002, and (3) a gain of $148,062 in the Subsidy Year, along with an opportunity cost of $44,001, and a rehabilitation cost of at least $915,960.

[1] CSXT notes that the switch track to Metals was unavailable for six months in 2005. Metals is responsible for the maintenance of the switch track. The switch track was so overgrown with vegetation that CSXT trains could not reach Metals' facility. However, CSXT does not know whether Metals' volume of traffic would have even increased to 32 carloads had Metals kept its switch track open.

3. The Line requires substantial rehabilitation.

As a result of the limited volume of local traffic on the Line, CSXT has operated the Line as excepted track, with a maximum operating speed of 10 miles per hour as permitted by FRA. 49 C.F.R. § 213.4(e)(1). Mr. M.P. Hunnicutt, the Roadmaster responsible for the physical condition of the Line has submitted a verified statement (See Exhibit F) describing the rehabilitation work that must be performed on the Line in order for it to meet FRA Class 1 standards. Mr. Hunnicutt believes that the Line must be restored to FRA Class 1 standards for efficient operation and to avoid derailments. Mr. Hunnicutt is very familiar with the Line, since he inspects it on a regular basis as excepted track.[2] His most recent inspection occurred on April 14, 2006. The following discussion of the condition of the Line is based on Mr. Hunnicutt's Verified Statement.

Because of the continuous low local traffic levels resulting in insufficient revenues, it has been years since the Line was rehabilitated. Although the rail does not require replacing rail, significant tie and ballast replacement is necessary to stabilize the Line, as well as surfacing the Line. Ties and ballast must be replaced on the Line and at the switch points on the Line. In addition, road crossings must be renewed.

Mr. Hunnicutt plans to replace 800-1,000 ties per mile on the Line. The cost of replacing a tie is $60. That cost includes removing and disposing of the existing tie, the cost of the new tie, tie plate, and spikes, the cost of labor and equipment to install the tie, and the cost of transportation for the tie. Mr. Hunnicutt also proposes to replace switch ties at four locations on the Line. Each switch requires the installation of 45 ties Mr. Hunnicutt estimates the cost of

[2] Pursuant to 49 C.F.R. § 213.233(c), excepted track is required to be inspected on a weekly basis.

switch ties to be about $110 each. Switch ties are much larger than regular ties and are more difficult to remove and install. These factors account for the difference in the cost of the switch ties. There are 28 road crossings on the Line that require renewal at a cost of $4,500 per crossing.

Mr. Hunnicutt estimates, based on his experience and knowledge of the Line that it will cost CSXT between $915,960 and $1,068,840 to rehabilitate the Line.

4. Operation of the Line.

Mr. Allen has described the operation of the Line (See Exhibit G). He concludes that the Line is difficult to operate and cannot be operated efficiently because of the poor condition of the Line. It normally takes more than one crew to provide service to the Line from Greenville, SC.

5. Alternate transportation is readily available.

As previously noted, Pickens can interchange traffic with either CSXT at Belton Yard or NS at Anderson, SC. CSXT has an operating interchange with NS at Spartanburg, SC. Hence, even if CSXT abandons the Line, Pickens will continue to have rail service from NS for the overhead traffic that CSXT handles today.

Metals and Industries also have alternate transportation available. CSXT has made available to Industries and Metals transload facilities at Greenville, SC and Spartanburg, SC. Not only are these facilities less expensive for CSXT to operate than the Line, but their use would also result in more efficient service. Customers will no longer have to wait for a train to navigate the obstacles necessary to reach their facilities on the Line. The driving distance between Greenville and Belton is approximately 30 miles. The transload facilities are located near Interstate Highways 85, 26, and 385. Highway access to Belton is over US Route 76, and State Route 20.

Although the transloading service may be more expensive than direct rail service, CSXT urges the Board not to require CSXT to continue providing service when it will not be able to earn a reasonable return on the investment in the line.

In addition to the transloading facilities, Industries and Metals have access to motor carrier transport. Heavy hauling trucking companies in the Belton area include: Associated Transportation Systems, Inc., C & N Hauling, Herron Trucking, McBride Trucking, and Pulliam Trucking Company Incorporated. CSXT notes that for the six months in 2005 when CSXT was unable to serve Metals because Metals switch track was overgrown with vegetation, Metals used alternate transportation.

6. Summary.

Considering only local traffic results in the Line incurring an avoidable loss. This avoidable loss demonstrates that continued operation of the Line is a burden on CSXT and interstate commerce and warrants abandonment. *San Pedro Railroad Operating Company, LLC–Abandonment Exemption–in Cochise County, AZ*, STB Docket No. AB-1081X (STB served February 3, 2006) at 3-4. Considering the overhead traffic, the Line is still a burden on CSXT and interstate commerce because the rehabilitation costs cannot be recouped. There is no guarantee that Pickens would not reroute its traffic over NS or that Metals and Industries would continue to route traffic over the Line. The board has concluded that where there is limited traffic that might stop moving over a rail line, as is the case here with the overhead and local traffic, a railroad should not be burdened with a substantial rehabilitation cost that it will take the railroad many years to recover. *See CSX Transportation, Inc..–Discontinuance–at Memphis, in Shelby County, TN*, STB Docket No. AB-55 (Sub-No. 618) (STB served October 22, 2002 and May 15, 2003.

The overriding factor that warrants an exemption for the abandonment of the Line is the need to repair the Line. Without the rehabilitation costs of at least $915,960, the Line still loses money on local traffic, but once the rehabilitation costs of at least $915,960 are introduced to the financial calculus of the Line, it is clear that even including the reroutable overhead traffic on the Line, the traffic cannot financially support the Line.

CSXT incurred a loss on local traffic in the last full year of operation and projects losses into the future. In addition to operating losses and opportunity costs, CSXT faces rehabilitation costs of between $915,960 and $1,068,840.

ARGUMENT SUPPORTING THE ABANDONMENT

CSXT seeks an exemption under 49 U.S.C. § 10502 from the applicable requirements of 49 U.S.C. § 10903 in order to abandon the Line.

Under 49 U.S.C. § 10502, the Board must exempt a transaction from regulation when it finds that:

(1) regulation is not necessary to carry out the rail transportation policy of 49 U.S.C. § 10101; and

(2) either:

(a) the transaction is of limited scope, or

(b) regulation is not necessary to protect shippers from the abuse of market power.

The legislative history of Section 10502 reveals a clear Congressional intent that the Board should liberally use its exemption authority to free certain transactions from the administrative and financial costs associated with continued regulation. In enacting the Staggers Rail Act of 1980, Pub. L. No. 96-488, 94 Stat. 1895, Congress encouraged the Board's

predecessor agency to liberally use the expanded exemption authority under former Section 10505:

> The policy underlying this provision is that while Congress has been able to identify broad areas of commerce where reduced regulation is clearly warranted, the Commission is more capable through the administrative process of examining specific regulatory provisions and practices not yet addressed by Congress to determine where they can be deregulated consistent with the policies of Congress. The conferees expect that, consistent with the policies of this Act, the Commission will pursue partial and complete exemption form remaining regulation.

H.R. Rep No. 1430, 96 the Cong. 2d Sess. 105 (1980). See also *Exemption From Regulation--Boxcar Traffic*, 367 I.C.C. 424, 428 (1983), vacated and remanded on other grounds, *Brae Corp. v. United States*, 740 F.2d 1023 (D.C. Cir 1984). Congress reaffirmed this policy in the conference report accompanying the ICC Termination Act of 1995, Pub. L. No. 104-88, 109 Stat. 803, which re-enacted the rail exemption provision as Section 10502. H.R. Rep. No. 422, 104th Cong., 1st Sess. 168-69 (1995).

A. The Application of 49 U.S.C. § 10903 Is Not Necessary to Carry Out the Rail Transportation Policy

Detailed scrutiny of this transaction is not necessary to carry out the rail transportation policy. An exemption would minimize the unnecessary expense associated with the preparation and filing of an abandonment application, expedite regulatory decisions and reduce regulatory barriers to exit. 49 U.S.C. § 10101 (2) and (7). The abandonment by CSXT will not result in a loss of transportation service. Pickens can reroute the overhead traffic on the Line. Metals and Industries can either use the CSXT transload facilities or use truck. Granting this exemption would eliminate the need for CSXT to spend at least of at least $915,960 to rehabilitate the Line, and therefore, fosters sound economic conditions and encourages efficient management by permitting the rationalization of a rail line that does not support the cost of its rehabilitation. 49

U.S.C. § 10101 (3), (5) and (9). Other aspects of the rail transportation policy are not adversely affected. For example, competition and the continuation of a sound rail transportation system are not affected since the public will not be deprived of any needed rail services.

B. This Transaction Is Of Limited Scope

The proposed transaction is of limited scope. CSXT seeks to abandon a 12.74-mile line in one county in South Carolina that serves only two shippers.

C. This Transaction Will Not Result In An Abuse Of Market Power.

CSXT is abandoning the Line. Pickens will be able to reroute the overhead traffic on the Line over the NS and receive an interchange of traffic at Anderson, SC. Metals has used alternate transportation while its switch track was closed for six months in 2005. Industries and Metals have transload facilities available in Greenville, SC, about 30 miles from their facilities on the Line, as well as truck transportation.

ENVIRONMENTAL REPORT

An Environmental Report is in Exhibit B.

HISTORIC REPORT

A Historic Report is in Exhibit C.

FEDERAL REGISTER NOTICE

A draft Federal Register notice is attached hereto as Exhibit D.

LABOR PROTECTION

The interests of railroad employees of CSXT who may be adversely affected by the proposed abandonment will be adequately protected by the labor protective conditions in *Oregon Short Line R. Co.--Abandonment--Goshen*, 360 I.C.C. 91 (1979).

CONCLUSION

The Line requires CSXT to expend between $915,960 and $1,068,840 to rehabilitate it to FRA Class 1 condition. Local traffic on the Line was handled at a loss of $118,717 in the Base Year. Even considering the overhead traffic on the Line, all of which can be rerouted today, insufficient profit is generated to warrant the expensive rehabilitation of the Line.

Application of the regulatory requirements and procedures of 49 U.S.C. § 10903 is not required to carry out the rail transportation policy set forth in 49 U.S.C. § 10101, as previously shown. Nor is Board regulation required to protect shippers from the abuse of market power. Moreover, this abandonment is of limited scope. Accordingly, CSXT respectfully urges the Board to grant the proposed abandonment of the 12.74-mile Line.

ENVIRONMENTAL REPORT

CSX TRANSPORTATION, INC.

DOCKET AB-55 (SUB-NO. 664X)

The following information is provided in accordance with 49 C.F.R. Section 1105.7:

(1) PROPOSED ACTION AND ALTERNATIVES

Describe the proposed action, including commodities transported, the planned disposition (if any) of any rail line and other structures that may be involved, and any possible changes in current operations or maintenance practices. Also describe any reasonable alternatives to the proposed action. Include a readable, detailed map and drawings clearly delineating the project.

CSX Transportation, Inc. (CSXT) proposes to abandon 12.74 Miles of its rail line between Pelzer (railroad milepost AKL 39) to the end of track near Belton (railroad milepost AKL 26.26), Anderson County, South Carolina.

The purpose for the proposed abandonment is to permit CSXT to avoid the maintenance and rehabilitation expenses on the line. The revenue generated by the on-line shippers is insufficient to cover the costs of operation and the rehabilitation and maintenance costs. In addition, CSXT is incurring opportunity costs from continuing to operate the line.

During the past several years, miscellaneous commodities have been handled, however, the principal commodity shipped to this line has been plastic. The overhead traffic being delivered to the Pickens Railway has predominately been limestone and steel.

Traffic bound to this line segment has the ability to be trans-loaded, trucked or rerouted on rail via the Pickens Railway and Norfolk Southern Railroad.

Abandonment of this line will result in the removal of the rail, crossties, and upper layer of ballast; and operations and maintenance of this line will cease.

The only alternative would be not to abandon and to pass the any operating losses and capital costs of retaining the line to all other CSXT customers. This would not be a prudent utilization of carrier resources.

Two maps, which delineate the proposed project, are attached. (See Attachments 1 and 2.)

(2) TRANSPORTATION SYSTEM

Describe the effects of the proposed action on regional or local transportation systems and patterns. Estimate the amount of traffic (passenger or freight) that will be diverted to other transportation systems or modes as a result of the proposed action.

There is no passenger traffic on this line.

There will be no substantial effect on existing regional or local transportation systems or patterns. Traffic destined for this line can potentially remain rail served. Any traffic diverted to truck should be minimal.

(3) LAND USE

(i) **Based on consultation with local and/or regional planning agencies and/or a review of the official planning documents prepared by such agencies, state whether the proposed action is consistent with existing land use plans. Describe any inconsistencies.**

Applicant received a response dated January 30, 2006 from the Town of Pelzer Planning Department stating "After review of Attachment 1, it appears that the "END ABANDONMENT"...is a point before you arrive at the Town of Pelzer's municipal limits. The abandonment does not affect anything within the town's planning." (See Attachment 3)

Applicant received a response dated February 14, 2006 from Mayor Rufus Callahan of the City of Belton including the Comprehensive Plan for the City of Belton. (See Attachment 4)

Applicant has not received a response to its inquiries dated January 24, 2006 to Mr. Steven Newton of the Anderson County Planning

Department seeking information regarding this statement. (See Attachment 5)

However, on March 14, 2006 CSXT attended a meeting with Anderson County Planning officials regarding the proposed action, timeline and opportunities, such as OFA and NITU, which would be available to the County. Officials at the County are reviewing their options and are aware of the filing date.

(ii) **Based on consultation with the U. S. Soil Conservation Service, state the effect of the proposed action on any prime agricultural land.**

Applicant has not received a response to its inquiry dated January 24, 2006 to the U. S. Department of Agriculture, Natural Resources Conservation Service for Anderson County, South Carolina, seeking information regarding this statement. (See Attachment 6)

While some prime farmland may exist in the vicinity of this project, Applicant feels the simple removal of track material should not have an adverse impact.

(iii) **If the action affects land or water uses within a designated coastal zone, include the coastal zone information required by 1105.9.**

Anderson County is not located within South Carolina's Coastal Zone Management jurisdiction.

(iv) **If the proposed action is an abandonment, state whether or not the right of way is suitable for alternative public use under 49 U.S.C. 10906 and explain why.**

The properties proposed to be abandoned, may be suitable for other public purposes, but may be subject to reversionary interests that may affect the transfer of title for other than rail purposes.

(4) ENERGY

(i) **Describe the effect of the proposed action on transportation of energy resources.**

The proposed action will have no effect on the transportation of energy resources.

(ii) **Describe the effect of the proposed action on recyclable commodities.**

The proposed action should have a minimal impact on the movement and/or recovery of recyclable commodities. There were 16 carloads of potentially recyclable commodity shipped on this line segment in the base year. Any recyclable commodities can potentially be routed via rail over other carriers or truck served.

(iii) **State whether the proposed action will result in an increase or decrease in overall energy efficiency and explain why.**

The proposed action will not result in an increase or decrease in overall energy efficiency.

(iv) **If the proposed action will cause diversions from rail to motor carriage of more than: (A) 1,000 rail carloads a year; or (B) an average of 50 rail carloads per mile per year for any part of the affected line, quantify the resulting net change in energy consumption and show the data and methodology used to arrive at the figure given.**

There will be no diversion of rail traffic to motor carriage in excess of the above thresholds.

(5) AIR

(i) **If the proposed action will result in either: (A) an increase in rail traffic of at least 100% (measured in gross ton miles annually) or an increase of at least eight trains a day on any segment of rail line affected by the proposal, or (B) an increase in rail yard activity of at least 100% (measured by carload activity), or (C) an average increase in truck traffic of more than 10% of the average daily traffic or 50 vehicles a day on any affected road segment, quantify the anticipated effect on air emissions.**

The above thresholds will not be exceeded.

(ii) **If the proposed action affects a class I or non-attainment area under the Clean Air Act; and will it result in either: (A) an increase in rail traffic of a least 50% (measured in gross ton miles annually) or an increase of at least three trains a day on any segment of rail line, or (B) an increase in rail yard activity of a least 20% (measured by carload activity), or (C) an average increase in truck traffic of more than 10% of the average daily traffic or 50 vehicles a day on a given road segment, then state whether any expected increased emissions are within the parameters established by the State Implementation Plan.**

The above thresholds will not be exceeded.

(iii) **If transportation of ozone depleting materials (such as nitrogen oxide and freon) is contemplated, identify: the materials and quantity, the frequency of service; safety practices (including any speed restriction); the applicant's safety record (to the extent available) on derailments, accidents and spills; contingency plans to deal with accidental spills; and the likelihood of an accidental release of ozone depleting materials in the event of a collision or derailment.**

Not applicable.

(6) NOISE

If any of the thresholds identified in item (5)(i) of this section are surpassed, state whether the proposed action will cause: (i) an incremental increase in noise levels of three decibels Ldn or more, or (ii) an increase to a noise level of 65 decibels Ldn or greater. If so, identify sensitive receptors (e.g., schools, libraries, hospitals, residences, retirement communities, and nursing homes) in the project area, and quantify the noise increase for these receptors if the thresholds are surpassed.

The above thresholds will not be exceeded.

(7) SAFETY

(i) **Describe any effects of the proposed action on public health and safety (including vehicle delay time at railroad grade crossings).**

Applicant believes that the abandonment will result in an improvement to public health and safety by the elimination of thirty nine (39) road crossings.

(ii) **If hazardous materials are expected to be transported, identify: the materials and quantity; the frequency of service; whether chemicals are being transported that, if mixed, could react to form more hazardous compounds; safety practices (including any speed restrictions); the applicant's safety record (to the extent available) on derailments, accidents and hazardous spills; the contingency plans to deal with accidental spills; and the likelihood of an accidental release of hazardous materials.**

Not applicable.

(iii) **If there are any known hazardous waste sites or sites where there have been known hazardous material spills on the right of way, identify the location of those sites and the types of hazardous materials involved.**

Applicant's records indicate that there was one incident involving a hazardous material release on October 8, 1985 at Williamston, South Carolina (Railroad Milepost AKL 37). Four covered hoppers derailed and overturned releasing four hundred (400) tons of Ammonium Nitrate. CSX dispatched a Hazmat response team who recovered the material and disposed of it in accordance with all state and federal guidelines.

(8) BIOLOGICAL RESOURCES

(i) **Based on consultation with the U. S. Fish and Wildlife Service, state whether the proposed action is likely to adversely affect endangered or threatened species or areas designated as a critical habitat, and if so, describe the effects.**

Applicant has not received a response to its inquiry dated January 24, 2006, to the U. S. Department of the Interior, Fish and Wildlife Service in Charleston, South Carolina, Indiana, seeking information regarding this statement. (See Attachment 7)

Based upon Applicant's intention to remove only

the track material and the upper layer of ballast, we do not believe that any federally endangered or threatened species will be negatively affected or critical habitats modified if the line is abandoned.

(ii) **State whether wildlife sanctuaries or refuges, National or State parks or forests will be affected, and describe any effects.**

Based upon Applicant's review of the area, the line is not within any wildlife sanctuaries, refuges, National or State Parks or forests.

(9) WATER

(i) **Based on consultation with State water quality officials, state whether the proposed action is consistent with applicable Federal, State or local water quality standards. Describe any inconsistencies.**

Applicant received a response dated February 24, 2006 from the South Carolina Department of Health and Environmental Control (SCDHEC). (See Attachment 8)

Applicant's initial letter did not specify the method by which track reclamation would take place. Therefore, Applicant has specified its proposed actions in a letter dated March 21, 2006 to Ms. Vivianne Vejdani of the SCDHEC. (See Attachment 11)

Applicant does not contemplate any scenario in which the SCDHEC's recommendations should be necessary since the removal of material will be accomplished by use of the right of way for access, along with existing public and private crossings, and no new access roads are contemplated. Applicant does not intend to disturb any of the underlying roadbed or perform any activities that would cause sedimentation or erosion of the soil, and do not anticipate any dredging or use of fill in the removal of the track material. The crossties and/or other debris will be transported away from the rail line and will not be discarded along the right of way nor be placed or left in streams or wetlands, or along

the banks of such waterways. Also, during track removal, appropriate measures will be implemented to prevent or control spills from fuels, lubricants or any other pollutant materials from entering any waterways.

Applicant does not contemplate any action known to be inconsistent with federal, state and/or local water quality standards. Any necessary permits or applications will be obtained as well as compliance with conditions or procedures required by regulatory agencies.

(ii) **Based on consultation with the U. S. Army Corps of Engineers, state whether permits under Section 404 of the Clean Water Act (33 U.S.C. 1344) are required for the proposed action and whether any designated wetlands or 100-year flood plains will be affected. Describe the effects.**

Applicant received a response dated March 2, 2006 from the U. S. Army Corps of Engineers in Charleston, South Carolina stating *"...the project will not require a Department of the Army permit pursuant to Section 10 of the Rivers and Harbors Act of 1899, nor will it require Department of the Army permit pursuant to Section 404 of the Clean Water Act."* (See Attachment 9)

Applicant is not aware of any designated wetlands or 100-year flood plains within the proposed project.

Upon receiving abandonment authority, removal of material will be accomplished by use of the right of way for access, along with existing public and private crossings, and no new access roads are contemplated. We do not intend to disturb any of the underlying roadbed or perform any activities that would cause sedimentation or erosion of the soil, and do not anticipate any dredging or use of fill in the removal of the track material. The crossties and/or other debris will be transported away from the rail line and will not be discarded along the right of way nor be placed or left in streams or wetlands, or along the banks of such waterways. Also, during track removal, appropriate measures will be implemented to prevent or control spills from fuels,

lubricants or any other pollutant materials from entering any waterways. Based upon this course of action, Applicant does not believe a permit under Section 404 of the Clean Water Act will be required.

(iii) **State whether permits under Section 402 of the Clean Water Act (33 U.S.C. 1342) are required for the proposed action. (Applicants should contact the U. S. Environmental Protection Agency or the state environmental protection or equivalent agency if they are unsure whether such permits are required).**

Applicant received a response dated February 9, 2006 from the U.S. Environmental Protection Agency, Region 3 in Atlanta, Georgia stating *"There is not enough information in your leter for EPA to state whether or not this activity is subject to National Pollutant Discharge Elimination System permitting requirements. The State of South Carolina Department of Health and Environmental Control (SCDHEC) has been authorized to implement the NPDES permitting program, under Section 402 of the SWA. Please rely on the response you receive from the State for final determination in this matter."* (See Attachment 10)

Applicant has responded to the initial letter of the SCDHEC. (See Attachment 11)

Based upon the course of action described in Section 9 (ii), Applicant does not believe a permit under Section 402 of the Clean Water Act will be required.

10. MITIGATION

Describe any actions that are proposed to mitigate adverse environmental impacts, indicating why the proposed mitigation is appropriate.

Applicant does not anticipate any adverse environmental impacts in the project area as a result of this abandonment, however, if mitigation is necessary, Applicant will comply with State and Federal regulations and obtain any necessary permits required.

Mr. Dave Geraci, Manager-Network Rationalization
CSX Transportation
500 Water Street – J200
Jacksonville, FL 32202

Dear Mr. Geraci:

On behalf of Mayor Kenneth Davis, I'm responding to the letter concerning abandonment of a portion of railroad line near Belton, S.C. to a point near the Town of Pelzer.

After review of Attachment 1, it appears that the "END ABANDONMENT, AKL 39.0=V.S. 2059+20+/-" is a point before you arrive at the Town of Pelzer's municipal limits. The abandonment does not affect anything with the town's planning.

Sincerely,

Skip Watkins

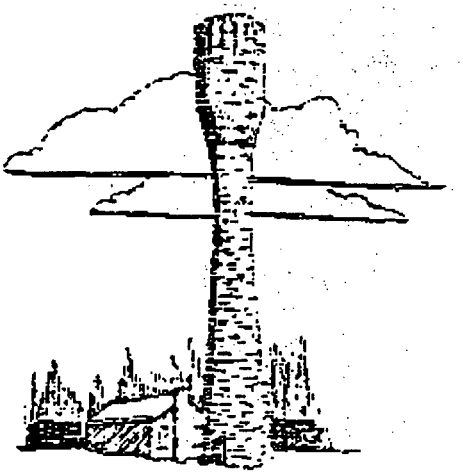
Rufus Callaham, Mayor
City of Belton

Attachment

City of Belton, South Carolina

COMPREHENSIVE PLAN



Prepared April 27, 1999

by:

The Planning Commission of the City of Belton

and

The Appalachian Council of Governments

Revised: May 4, 2004

Transit

Currently, there is no public transit available in the City of Belton. The municipalities of Clemson, Anderson, Greenville, and Spartanburg are the only Upstate communities with fixed route transit service.

Taxicab Service

The City of Belton does not have a taxi service in the city limits.

Railroads

The City of Belton is connected to the rest of the state and southeast by CSX and Pickens Railroad lines.

Airport

The Greenville - Spartanburg International Airport is located along I-85 in Spartanburg County, about three miles from downtown Greer. This location places it about halfway between the cities of Greenville and Spartanburg, the two largest cities in Upstate South Carolina. The airport has one runway of 11,000 feet. The airport can accommodate any type of aircraft in common use for passengers and cargo service. The field is open 24 hours a day and controlled between 6:30am and 12am. The airport has an instrument landing system, one fixed base operator and one flying school. There are approximately 25 hanger spaces available to the public although there is a short waiting list.

The Anderson County Airport is located on Airport Road, approximately five miles west of Anderson. The airport is a general aviation facility with two runways of 5,000 feet. The airport is owned and operated by the county.

UTILITIES

Water

The City of Belton provides water distribution services for the City of Belton and its surrounding area. It is the 76th largest water provider in South Carolina in terms of average pumpage. The utility gets its water supply from the Belton-Honea Path Water Association. The system serves an estimated 6,700 people in the Belton area, with a per capita use rate of 197 gallons per day.

The Belton-Honea Path Water Association provides water supply and treatment for the Belton and Honea Path areas. It is the 46 largest water provider in the state. The Association has an average pumpage of 2 million gallons per day from the Saluda River.

The City of Belton is currently in a Phase I Water Distribution Upgrade. This includes installation of a total of 35 water mains that are either new or being upgraded, as well as the replacement of customer service lines. Also, the City of Belton is in the preliminary phase of construction of a new booster pump station, which will provide the City with an additional water supply. The Belton-Honea Path Water Association is in an initial phase of construction of a rural development grant that will include 700 new customers. This will include areas outside the city limits of Belton and the town limits of Honea Path.

Anderson County Planning Department
PO Box 8002
Anderson, SC 29622-8002

Dear Mr. Newton:

Please be advised that CSX Transportation, Inc. is considering abandonment of a portion of its rail line from Pelzer to the end of track near Belton, Anderson County, South Carolina, as depicted on the attached map.

This action requires Surface Transportation Board approval and Federal Regulations 49 C.F.R. 1105.7(3)(i) require that we develop a response to the following statement:

"Based on consultation with local and/or regional planning agencies and/or a review of the official planning documents prepared by such agencies, state whether the proposed action is consistent with existing land use plans. Describe any inconsistencies."

I would appreciate your advice as to the existence of a long-range comprehensive planning map for Anderson County and the line's relationship to such planning.

Enclosed, please find a distribution list of all parties that have been copied of the proposed action.

Sincerely,

January 24, 2006

U.S. Department of the Interior
Fish & Wildlife Service
PO Box 12559
Charleston, SC 29412

Gentlemen:

Please be advised that CSX Transportation, Inc. is considering abandonment of a portion of its rail line from Pelzer to the end of track near Belton, Anderson County, South Carolina, as depicted on the attached map.

The action requires Surface Transportation Board approval and Federal Regulations 49 C.F.R. 1105.7 (8) (i) and (ii) require that we develop responses to the following statements:

(i) Based on consultation with the U. S. Fish and Wildlife Service state whether the proposed action is likely to adversely affect endangered or threatened species or areas designated as a critical habitat, and if so, describe the effects.

(ii) State whether wildlife sanctuaries or refuges, National or State parks or forests will be affected, and describe any effects.

The removal of CSXT's rail material will be accomplished by use of the right of way for access, along with existing public and private crossings, and no new access roads are contemplated. We do not intend to disturb any of the underlying roadbeds and do not anticipate any dredging or use of fill in the removal of the track material. The crossties and/or other debris will be transported away from the rail line and will not be discarded along the right of way, nor be placed or left in streams or wetlands, or along the banks of such waterways. During track removal, appropriate measures will be implemented to prevent or control spills from fuels, lubricants or any other materials from entering any watercourses.

Based upon the above described actions, we would appreciate your concurrence in CSXT's position that there would be no adverse impact to any federally-listed endangered or threatened species, critical habitats, wildlife sanctuaries or refuges, National or State parks, or forests.

We would appreciate your comments; and, if you have any questions, please feel free to contact me.

Enclosed, please find a distribution list of all parties that have been copied of the proposed action.

Sincerely,

RE: Rail Abandonment in Anderson County, SC

Dear Mr. Geraci:

The South Carolina Department of Health and Environmental Control Bureau of Water administers applicable regulations pertaining to water quality standards and classifications, including wetlands protection, in accordance with the South Carolina Pollution Control Act, the Federal Clean Water Act, the State Stormwater Management and Sediment Reduction Act, and associated regulations for all of these statutes.

To ensure protection and maintenance of water quality standards and classified uses, including wetlands functions, the Department recommends the following issues be addressed when planning and constructing this project:

1. Any placement of fill material in waters of the state, including jurisdictional wetlands, will require a Department administered Section 401 Certification and an Army Corps of Engineers administered Section 404 Permit. When evaluating applications for fill in wetlands, demonstration of avoidance of wetland impacts, minimization of wetland impacts and mitigation of unavoidable wetland impacts provides assurances that impacts have been reduced to the extent possible and that water quality standards will be maintained. Documentation of these measures will be required.

2. If a state land disturbance permit from the Sediment, Erosion and Stormwater program is required, the placement of fill material into non-jurisdictional wetlands will require compensation for the impacts to these wetlands.

3. A Navigable Waters Permit will also be required for all construction within navigable waters of South Carolina.

Other regulations not administered by this Bureau may apply to your project. Thank you for the opportunity to comment on this project. Please call me at (803) 898-4243, or email me at vejdanvh@dhec.sc.gov if you have any questions.

Sincerely,

Vivianne Vejdani

REPLY TO
ATTENTION OF

March 2, 2006

Regulatory Division

Mr. Dave Geraci
CSX Transportation
500 Water Street, J200
Jacksonville, Florida 32202

Dear Mr. Geraci:

This is in response to your letter received January 30, 2006, concerning the proposed abandonment of the rail line from the Town of Pelzer to the Town of Belton in Anderson County, South Carolina.

Based on the information you provided, it appears all work will be conducted in uplands, that no fill material will be placed in Waters of the United States or adjacent wetlands, there will be no mechanized clearing of forested wetlands, and no fill material or structures will be placed in navigable waters of the United States. Therefore, the project will not require a Department of the Army permit pursuant to Section 10 of the Rivers and Harbors Act of 1899, nor will it require Department of the Army permit pursuant to Section 404 of the Clean Water Act. The proposed work may still require local or state authorization.

Your cooperation in the protection and preservation of our navigable waters and cultural resources is greatly appreciated. In future correspondence concerning this matter please refer to SAC-53-2006-0151-6.

If you have any questions concerning this matter, please contact me at A/C 843-329-8025.

Respectfully,

W. David Chamberlain
Biologist

Dave Geraci
Manager, Network Rationalization
500 Water Street – J200
Jacksonville, Florida 32202

Dear Mr. Geraci:

This letter is in response to your letter of January 24, 2006, requesting comments from the Environmental Protection Agency (EPA) on the abandonment of a portion of CSX Transportation, Inc., rail line from Pelzer to the end of track near Belton, Anderson County, South Carolina.

Please be aware that this activity would be subject to the requirements of the Clean Water Act (CWA) if, in the process of dismantling the track, one acre or more of land are disturbed by clearing or grading and if storm water discharges from this disturbance enter either a surface water body, by direct conveyance (pipe, ditch, etc), or through a municipal separate storm sewer system. There is not enough information in your letter for EPA to state whether or not this activity is subject to National Pollutant Discharge Elimination System (NPDES) permitting requirements. The State of South Carolina Department of Health and Environmental Control (SCDHEC) has been authorized to implement the NPDES permitting program, under Section 402 of the CWA. Please rely on the response you receive from the State for a final determination in this matter.

If EPA can be of further assistance to you in this matter, please contact me.

Sincerely,

Roosevelt Childress, Chief
NPDES and Biosolids Permits Section
Permits, Grants and Technical Assistance Branch

Dave Geraci
Manager - Network Rationalization

March 21, 2006

Ms. Vivianne Vejdani
South Carolina DHEC
2600 Bull Street
Columbia, SC 29201

Dear Ms. Vejdani

Thank you for your letter dated February 24, 2006 regarding the CSXT proposed abandonment in Anderson County, South Carolina. This letter is in response to both your letter and our telephone conversation of March 17, 2006.

Your letter outlines several recommendations that deal with the placement of fill material or land disturbances. Since our initial letter did not specify the method by which any federally approved salvage activities would be conducted, I would like to offer this additional information in order to clarify the proposed activity.

CSXT does not contemplate any scenario in which the SCDHEC's initial recommendations should be necessary since the removal of material will be accomplished by use of the current right of way for access, along with existing public and private crossings, with no new access roads are contemplated. CSXT does not intend to disturb any of the underlying roadbed or perform any activities that would cause sedimentation or erosion of the soil, and do not anticipate any dredging or use of fill in the removal of the track material. The crossties and/or other debris will be transported away from the rail line and will not be discarded along the right of way nor be placed or left in streams or wetlands, or along the banks of such waterways. Also, during track removal, appropriate measures will be implemented to prevent or control spills from fuels, lubricants or any other pollutant materials from entering any waterways.

CSXT does not contemplate any action known to be inconsistent with federal, state and/or local water quality standards. Any necessary permits or applications will be obtained as well as compliance with conditions or procedures required by regulatory agencies.

This information is also in the attached Environmental Report which will be part of the Surface Transportation Board filing.

I look forward to receiving your comments regarding the proposed activity. Please feel free to contact me should you have any further questions.

Sincerely,

Attachments

RE: CSX Transportation, Inc.
Proposed Line Abandonment
Anderson County, South Carolina
Docket AB-55 (Sub-No. 664X)

Dear Ms. Edmonds:

Please be advised that CSX Transportation, Inc. is considering abandonment of a portion of its rail line from Pelzer to the end of track near Belton, Anderson County, South Carolina, as depicted in the attached historic report.

In connection with rail lines that are to become the subject of applications for authority to abandon, Federal Regulations at 49 CFR 1105.8(d), require that a Historic Report be submitted to the State Historic Preservation Officer prior to filing with the Surface Transportation Board. In accordance with those Regulations, I am attaching a Historic Report covering the above-proposed abandonment.

I will appreciate receiving your letter confirming that this project will have no impact upon cultural resources. If you have questions, please feel free to call me.

Sincerely,

HISTORIC REPORT

CSX TRANSPORTATION, INC.
Pelzer to the end of track near Belton
Anderson County, South Carolina
DOCKET AB-55 (SUB-NO. 664X)

~~1105.7(e)(1)~~

PROPOSED ACTION AND ALTERNATIVES. Describe the proposed action, including commodities transported, the planned disposition (if any) of any rail line and other structures that may be involved, and any possible changes in current operations or maintenance practices. Also describe any reasonable alternatives to the proposed action. Include a readable detailed map and drawings clearly delineating the project.

CSX Transportation, Inc. (CSXT) proposes to abandon 12.74 Miles of its rail line between Pelzer (railroad milepost AKL 39) to the end of track near Belton (railroad milepost AKL 26.26), Anderson County, South Carolina.

The purpose for the proposed abandonment is to permit CSXT to avoid the maintenance and rehabilitation expenses on the line. The revenue generated by the on-line shippers is insufficient to cover the costs of operation and the rehabilitation and maintenance costs. In addition, CSXT is incurring opportunity costs from continuing to operate the line.

During the past several years, miscellaneous commodities have been handled, however, the principal commodity shipped to this line has been plastic. The overhead traffic being delivered to the Pickens Railway has predominately been limestone and steel.

Traffic bound to this line segment has the ability to be trans-loaded, trucked or rerouted on rail via the Pickens Railway and Norfolk Southern Railroad.

Abandonment of this line will result in the removal of the rail, crossties, and upper layer of ballast; and operations and maintenance of this line will cease.

The only alternative would be not to abandon and to pass the any operating losses and capital costs of retaining the line to all other CSXT customers. This would not be a prudent utilization of carrier resources.

Two maps, which delineate the proposed project, are attached. (See Attachments 1 and 2.)

~~1105.8(d)~~

(1) **A U.S.G.S. topographic map (or an alternate map drawn to scale and sufficiently detailed to show buildings and other structures in the vicinity of the proposed action) showing the location of the proposed action, and the locations and approximate dimensions of railroad structures that are 50 years old or older and are part of the proposed action.**

Attached are copies of the Belton East, Belton West and Pelzer quadrangle topographic maps prepared by the U. S. Department of Interior Geological Survey prepared by the U. S. Department of Interior Geological Survey. The line to be abandoned has been identified by a heavy black diagonal line. (See Attachments 3 - 1 through 3 - 7.)

There is one CSXT-owned structures that is 50 years old or older that may be eligible for listing in the National Register that are part of the proposed action.

(2) **A written description of the right of way (including approximate widths, to the extent known), and the topography and urban and/or rural characteristic of the surrounding area:**

The right of way width along this right of way is approximately 50 feet from the centerline of track. The rail line traverses several small streams and communities.

(3) **Good quality photographs (actual photographic prints, not photocopies) of railroad structures on the property that are 50 years old or older and of the immediately surrounding area:**

Digital Photographs of the one bridge structure have been printed and included. (See Attachments 4 and 5.)

(4) **The date(s) of construction of the structure(s), and the date(s) and extent of any major alterations, to the extent such information is known:**

Bridge Number 38.0 is located in the town of Williamston, SC. This is a 31-foot through-plate-girder bridge that traverses Cemetery Street (also known as S-30) and was built in 1912.

The structure has been modified as necessary throughout its existence to maintain safe railroad operation and perform routine maintenance.

(5) **A brief narrative history of carrier operations in the area, and an explanation of what, if any, changes are contemplated as a result of the proposed action:**

This line was acquired by the Greenville, Spartanburg and Anderson Railway (GS&A) between 1911 and 1913. The GS&A was chartered under the laws of South Carolina in 1910 as a street railway corporation. Shortly after completion of the electric railroad, the GS&A was acquired by the Piedmont and Northern Railway (P&N). The P&N replaced all electric operation with diesel between 1951 and 1958. The P&N was later acquired by the Seaboard Coast Line on July 1, 1969.

On November 1, 1980, Seaboard Coast Line Industries Inc. and Chessie System Inc. merged and became CSX Corporation. On April 30, 1987, the Baltimore & Ohio Railroad Company was merged into the Chesapeake and Ohio

Railway Company. The Chesapeake and Ohio Railway Company was merged into CSX Transportation on September 2, 1987.

Upon receiving abandonment authority, Applicant's operations and maintenance over this line will cease.

(6) **A brief summary of documents in the carrier's possession, such as engineering drawings, that might be useful in documenting a structure that is found to be historic:**

An Engineering Sketch of the proposed project has been included. (See Attachment 6.)

(7) **An opinion (based on readily available information in the railroad's possession) as to whether the site and/or structures meet the criteria for listing on the National Register of Historic Places (36 C.F.R. 60.4), and whether there is a likelihood of archeological resources or any other previously unknown historic properties in the project area, and the basis for these opinions (including any consultations with the State Historic Preservation Office, local historical societies or universities):**

A review of our records indicates there is one (1) CSXT-owned structure over 50 years old on this line segment that may be eligible for listing in the National Register.

We do not know of any significance or uniqueness to this structure that would warrant your consideration, since to our knowledge, it is not associated with any event that has made a contribution to the broad patterns of history; or were not associated with lives of persons significant to our past; do not embody the distinctive characteristics of a type, period or method of construction; and do not represent a significant and distinguishable entity whose components may lack individual distinction and have not or may not be likely to yield information important in prehistory or history.

We do not know of any archeological resources or any other previously unknown historic properties in the project area.

(8) **A description (based on readily available information in the railroad's possession) of any known prior subsurface ground disturbance or fill, environmental conditions (naturally occurring or man-made) that might affect the archeological recovery of resources (such as swampy conditions or the presence of toxic wastes), and the surrounding terrain.**

The line was disturbed during construction by cuts and fill and any archeological resources that may have been located in the proposed project area would have been affected at that time versus during the proposed salvage operations associated with rail removal. Our records do not indicate that any swampy conditions exist, or that any hazardous material spills have occurred within the project area.

Re: CSX Transportation Proposed Line Abandonment
Pelzer to Belton, Anderson County, South Carolina
Docket AB-55 (Sub-No. 664X)

Dear Mr. Geraci:

Thank you for your letter of March 17, which we received on March 22, regarding the above-referenced line abandonment. We appreciate your effort in identifying historic properties for this undertaking.

Based on the information provided, our office knows of no properties included in or eligible for inclusion in the National Register of Historic Places that will be affected by this project. Our comments are advisory only. The federal agency is responsible for determining if historic properties will be affected by the undertaking.

These comments may be provided to the appropriate federal agency as evidence of your consultation with the State Historic Preservation Office pursuant to Section 106 of the National Historic Preservation Act, as amended. If you have questions, please contact me at (803) 896-6169 or dobrasko@scdah.state.sc.us.

Sincerely,
Rebekah Dobrasko

Rebekah Dobrasko
Review and Compliance Coordinator
State Historic Preservation Office

EXHIBIT D–FEDERAL REGISTER NOTICE

STB Docket No. AB–55 (Sub-No. 664X)

CSX TRANSPORTATION, INC.–ABANDONMENT EXEMPTION–IN ANDERSON COUNTY, SC

Notice of Petition for Exemption to Abandon

On April 28, 2006 CSX Transportation, Inc. filed with the Surface Transportation Board, Washington, D.C. 20423, a petition for exemption for the abandonment of a line of railroad known as the Belton Subdivision, extending from railroad milepost AKL 39.00 near Pelzer, to milepost AKL 26.26, near Belton at the end of line, which traverses through United States Postal Service ZIP Codes 29627 and 29654, a distance of 12.74 miles, in Anderson County, SC. The line for which the abandonment exemption request was filed includes the station of Belton at milepost AKL 31.

The line does not contain federally granted rights-of-way. Any documentation in the railroad's possession will be made available promptly to those requesting it.

The interest of railroad employees will be protected by the labor protective conditions in *Oregon Short Line R. Co.–Abandonment–Goshen*, 360 I.C.C. 91 (1979).

Any offer of financial assistance will be due no later than 10 days after service of a decision granting the petition for exemption.

All interested persons should be aware that following abandonment of rail service and salvage of the line, the line may be suitable for other public use, including interim trail use.

Any request for a public use condition and any request for trail use/rail banking will be due no later than 20 days after notice of the filing of the petition for exemption is published in the Federal Register.

Persons seeking further information concerning abandonment procedures may contact the Surface Transportation Board or refer to the full abandonment regulations at 49 CFR part 1152. Questions concerning environmental issues may be directed to the Board's Section of Environmental Analysis.

An environmental assessment (EA) (or environmental impact statement (EIS), if necessary) prepared by the Section of Environmental Analysis will be served upon all parties of record and upon any agencies or other persons who commented during its preparation. Any other persons who would like to obtain a copy of the EA (or EIS) may contact the Section of Environmental Analysis. EAs in these abandonment proceedings normally will be made available within 60 days of the filing of the petition. The deadline for submission of comments on the EA will generally be within 30 days of its service.

EXHIBIT E–NEWSPAPER CERTIFICATION

CERTIFICATE OF PUBLICATION

The undersigned hereby certifies that notice of the proposed discontinuance of service in Docket No. AB-55 (Sub-No. 664X) was advertised on April 25, 2006 in the Anderson Independent Mail, a newspaper of general circulation in Anderson County, SC, as required by 49 C.F.R. § 1105.12.

LEGAL NOTICES - **CSX Transportation, Inc. gives notice that on or about April 28, 2006 it intends to file with the Surface Transportation Board, Washington, DC 20423, a petition for exemption under 49 U.S.C. 10502 from the prior approval requirements of 49 U.S.C. 10903, et seq., permitting the abandonment of a 12.74-mile line of railroad between railroad milepost AKL 26.26, near Belton, and railroad milepost AKL 39.00, near Pelzer which traverses through United States Postal Service ZIP Codes 29627 and 29654 in Anderson County, South Carolina. The proceeding has been docketed as No. AB 55 (Sub-No. 664X). The Board's Section of Environmental Analysis (SEA) will generally prepare an Environmental Assessment (EA), which will normally be available 60 days after the filing of the petition for abandonment exemption. Comments on environmental and energy matters should be filed no later than 30 days after the EA becomes available to the public and will be addressed in a Board decision. Interested persons may obtain a copy of the EA or make inquiries regarding environmental matters by writing to SEA, Surface Transportation Board, Washington, DC 20423 or by calling SEA at 202-565-1545. Appropriate offers of financial assistance to continue rail service can be filed with the Board. Requests for environmental conditions, public use conditions, or rail banking/trails use also can be filed with the Board. An original and 10 copies of any pleading that raises matters other than environmental issues (such as trails use, public use, and offers of financial assistance) must be filed directly with the Board's Office of the Secretary, 1925 K Street, NW., Washington, DC 20423 [See 49 CFR 1104.1(a) and 1104.3(a)], and one copy must be served on applicants' representative [See 49 CFR 1104.12(a)]. Questions regarding offers of financial assistance, public use or trails use may be directed to the Board's Office of Congressional and Public Services at 202-565-1592. Copies of any comments or requests for conditions should be served on the applicant's representative Louis E. Gitomer, Ball Janik, LLP, 1455 F Street, NW, Suite 225, Washington, DC 20005, (202) 638-3307.**

EXHIBIT F–VERIFIED STATEMENT OF MR. HUNNICUTT

BEFORE THE
SURFACE TRANSPORTATION BOARD

Docket No. AB-55 (Sub-No. 664X)

CSX TRANSPORTATION, INC.–ABANDONMENT EXEMPTION–
IN ANDERSON COUNTY, SC

VERIFIED STATEMENT OF MR. M.P. HUNNICUTT

My name is M.P. Hunnicutt. I am the Roadmaster for the Spartanburg, CN&L, and Belton subdivisions, which include the 12.76-mile rail line between milepost AKL 26.26, at Belton, the end of the line, and milepost AKL 39.00, at Pelzer, on the Southern Region, Florence Division, Belton Subdivision, in Anderson County, SC (the "Line"). I am located at 308 East Main Street, Laurens, SC 29360. My duties include responsibility for the track maintenance of the Spartanburg, CN&L, and Belton subdivisions. I have been in my current position for 16 months. I am in charge of 10 employees. Previously I was the assistant roadmaster at Charleston, SC.

I am very familiar with the Line. Either I or one of my employees is required to inspect the Line on a weekly basis pursuant to Federal Railroad Administration (the "FRA") regulations at 49 C.F.R. § 213.233(c). I personally inspected the Line as recently as April 14, 2006. I will describe the physical condition of the Line in two segments, first between mileposts AKL 26.26 and AKL 29.26 (the "Southern Line"), and second between mileposts AKL 29.26 and AKL 39.00 (the "Northern Line"). To provide efficient and economical operations over the Line, it must be returned to FRA Class 1 condition. The Line is currently FRA excepted track. The track condition has become

detrimental to safe operations. In the last six months a derailment has occurred. CSXT needs to replace ties, switch ties, ballast and surface the track to required geometry standards to stabilize the track and keep it from having vertical and lateral movement. Track surfacing consists of realigning the rail so that the gauge and elevation are constant to prevent the wheels of a train from losing contact with the rail at a specified point and causing a derailment. Surfacing the track helps maintain the track structure to the required geometry standards. The surfacing of track costs about $6,000 per mile for Class 1 track.

I have used a cost for a regular tie of $60.00 per tie based on CSXT's system costs. This includes the removal and disposal of existing ties, the cost of the new tie, tie plate, and spikes for each tie, and the installation of the new tie, tie plate, and spikes (which includes labor and transportation costs).

I have used a cost for a switch tie of $110.00 per tie based on CSXT's system costs. This includes the removal and disposal of existing ties, the cost of the new tie, tie plate, and spikes for each tie, and the installation of the new tie, tie plate, and spikes (which includes labor and transportation costs).

Based on CSXT's system costs, the cost of one carload of ballast is about $600.[1]

The Southern Line.

The Southern Line is three miles long. It has 100 lb. jointed rail with very poor tie condition. Because of the condition of the ties on the Southern Line, it is being operated as excepted track under the FRA regulations at 49 C.F.R. § 213.4. No production work (the use of CSXT system teams to repair the track) has been performed

[1] There are 80-85 tons of ballast per car, for a cost of about $7.00 per ton.

on the Southern Line since 1983. To rehabilitate the Southern Line to FRA Class 1 condition and perform the work efficiently, system teams should be utilized. However, these teams are more efficiently utilized on high volume corridors. To return the Southern Line to FRA Class 1 operating conditions will require the replacement of ties, the surfacing of the rail when the ties are replaced and the replacement of the ballast supporting the track structure. The specific material and costs required are as follows.

1. CSXT will need to install approximately 800 to 1,000 ties per mile at an average cost of $60.00 per tie. The cost of ties for the Southern Line would be at least $144,000 plus surfacing costs of $18,000 for total cost of at least $162,000.[2]

When rehabilitating a line and resurfacing the rail, CSXT installs 800-1,000 ties per mile for FRA Class 1 track instead of the minimum required 5 ties per 39-foot segment of rail (about 680 ties per mile). In a rehabilitation project as required by the Line, CSXT first replaces the ties. Then it replaces the ballast. Finally, the rail is surfaced. In replacing ballast and surfacing the line, old ties can move or the heads of spikes in the old ties can move under the rail. A spike head is not permitted under Class 1 track. It is CSXT's experience that using 6-8 ties per 39-foot section (800-1,000 per mile) permits the replacement of ballast and surfacing of the line so that it meets FRA Class 1 standards while avoiding the need to go back over the line and reinsert or adjust any ties that have moved or been displaced in the surfacing process.

2. There are seven road crossings on the Southern Line that must be renewed. I estimate the cost of renewing each road crossing to be $ 4,500. Each crossing is about 15 feet wide and will require rail surfacing for about 150 feet on each side of the crossing.

---

[2] If 1,000 ties are used, the cost for ties would be $180,000 and the cost including resurfacing would be $198,000.

Renewal of a crossing entails removal of the crossing board planks and rubber rail seal, replacement of all crossing ties within the width of the road, replacement of ballast and finally blacktopping the roadway within the crossing. The track is then resurfaced for 150 on either side of the crossing. For a 15-foot crossing, I estimate that it will require 8 ties, 8 to 10 tons of ballast and about six people (two track laborers and a foreman, and one tamper operator, one regulator operator and a foreman) working eight hours with equipment consisting of one tamper and one regulator Contractors are used to black top the finished crossing at an estimated cost of $110 per ton installed black top. I estimate the cost to renew seven road crossings to be $ 31,500.

3. There is one switch on the Southern Line at Belton Industries at milepost AKL 26.3 that requires the replacement of about 45 switch ties. Switches allow movement from one track to another. There is more lateral movement and there are greater vertical forces on the rail in switches. This added stress to the rail requires the use of more ties to stabilize the rail. The switch ties cost $110 each. The cost of replacing switch ties in this switch is about $4,950.

4. There is a yard located at Belton, SC known as Belton Yard between mileposts AKL 28.4 to AKL 29.0 and includes four tracks. This yard was constructed in approximately 1990 by the US Army Corp of Engineers. It is in good condition with 100 lb. rail and requires no rehabilitation at this time.

5. The tie and surfacing work will require 24 cars of ballast. The average cost of a car of ballast is $600.00, not including labor and transportation, for a total cost of about

$ 14,400. I estimate the total cost to return the Southern Line to FRA Class one operating condition to be at least $212,850.[3]

Once the Southern Line has been returned to FRA Class 1 condition, it will continue to require annual maintenance costing about $15,000.00 (at $5000 per mile standard maintenance cost).

The Northern Line.

The Northern Line is 9.74 miles long. It has 100 lb. jointed rail with very poor tie condition. Because of the condition of the ties on the Northern Line, it is being operated as excepted track under the FRA regulations at 49 C.F.R. § 213.4. No production work has been done since 1983. The poor tie condition caused a derailment on Jan 2, 2006. The derailment cause factor was T205 – defective or missing cross ties. The estimated cost of this derailment to CSXT was $2,000.00. CSXT forces spent one work day installing ties and setting up rail: removing broken ties, reinstalling ties with a back hoe and spiking them with a hydraulic spike hammer. This work required five people: a back hoe operator, foreman, and three track laborers. Derailment costs for this $2,000 repair are cost based on "replacement in kind" a lower average per tie cost – this means we do not cost these ties as new. To return the Northern Line to Class 1 operating conditions will require the replacement of ties, the surfacing of the rail when the ties are replaced and the replacement of the ballast supporting the track structure. The specific material and costs required are as follows.

1. CSXT will need to install approximately 800 to 1,000 ties per mile at an average cost of $60.00 per tie. The cost of ties for the Northern Line would be at least

[3] If 1,000 ties per mile are installed the cost to rehabilitate the Southern Line would be $248,850.

$ $467, 520 ($584,400 if 1,000 ties per mile are used) plus surfacing costs of $58,440 for a total cost of at least $525,960 ($642,840 if 1,000 ties per mile are used).

2. There are 21 road crossings on the Northern Line that must be renewed in the same manner and at the same cost as on the Southern Line. I estimate the cost to be $94,500.

3. There are three switches on the Northern Line: AKL 29.26 - Pickens connection), AKL 30.2 Wells Aluminum and AKL 34.9 Metals that require the replacement of about 45 switch ties each in the same manner and at the same cost as on the Southern Line. The cost of replacing switch ties is about $14,850.

4. At the clearance point of a normal switch track (from the beginning of the switch clearance point to end of CSXT maintenance is generally 150 feet, which CSXT usually maintains for train operations and right-of-way) and CSXT's Northern Line about 100 ties must be installed, for a total of 200 ties. Because of the greater length of CSXT ownership, the Metals' switch requires the installation of 150 ties. The total cost of ties, in addition to the switch ties for these three switches is $21,000.

5. The tie and surfacing work will require 78 cars of ballast. The average cost of a car of ballast is $600.00, not including labor and transportation, for a total cost of about $ 46,800.

I estimate the total cost to return the Northern Line to FRA Class one operating condition to be between $703,110 and $819,990.

Once the Northern Line has been returned to FRA Class 1 condition, it will continue to require annual maintenance of about $48,700.00 at $ 5000 per mile.

Total rehabilitation costs on the Line will be between $915,960 and $1,068,840.

I have been told by Mr. Frankie Allen that traffic on this line will continue to be very light. I have not observed more than two to three trains per week operating on the line. With no more business than there is on the Line, it is my opinion that the cost of upgrading the Line to FRA Class 1operating conditions cannot be financially justified. Even if the Line is returned to FRA Class 1 condition it will still need to be included in the five to seven year tie and surfacing cycle.

VERIFICATION

I, Mike Hunnicutt, declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this Verified Statement. Executed this ____ day of April 2006.

EXHIBIT G–VERIFIED STATEMENT OF MR. ALLEN

BEFORE THE
SURFACE TRANSPORTATION BOARD

Docket No. AB-55 (Sub-No. 664X)

CSX TRANSPORTATION, INC.–ABANDONMENT EXEMPTION–
IN ANDERSON COUNTY, SC

VERIFIED STATEMENT OF MR. FRANKIE ALLEN

My name is Frankie Allen. I am a Trainmaster for CSX Transportation, Inc. ("CSXT") on the Belton Subdivision and am located at 449 Evins Street, Spartanburg, South Carolina, 29303. My duties include supervising the general operations and customer switching on the CSXT Belton Subdivision, including the 12.74-mile rail line between milepost AKL 26.26, at Belton, the end of the line, and milepost AKL 39.00, at Pelzer, on the Southern Region, Florence Division, Belton Subdivision, in Anderson County, SC (the "Line").

I began my railroad career as Clerk in 1970 in Atlanta, GA, transferring to Greenwood, SC in August of 1970. I was promoted to Yardmaster Extra Board in 1978, and began working full time as a Yardmaster soon thereafter. I was promoted to Assistant Trainmaster in 1994. In 1996 I was promoted to Trainmaster.

I am very familiar with the operations on the Line. It is served by CSXT yard crews stationed in Greenville, SC. Currently there are two road switcher crews stationed in Greenville. One of these crews travels to Belton Yard three times a week to pick up and deliver interchange traffic with the Pickens Railway Company ("Pickens) on Sunday, Tuesday and Thursday nights. The road switcher crew also serves the two customers

located on the Line, Belton Industries ("Industries") at 1205 Hamby Road, Honea Path, SC 29654 and Belton Metals ("Metals") at 375 Sherrard Road, Belton, SC 29627.

The Line is classified as excepted track, and as such, speeds are restricted to 10 miles per hour. Due to this speed restriction, the travel time to Belton from Greenville, SC averages over 5 to 6 hours. Usually the crew cannot complete their work and return to Greenville in their scheduled eight hours. Another crew is generally used to complete work switching Industries and Metals and delivering cars for interchange to Pickens at Belton Yard. Occasionally, the crew is unable to utilize customer tracks (specifically at Metals because of either track conditions or vegetation on the track that Metals is responsible for maintaining) and must return the cars to Greenville. CSXT is restricted to using four axle locomotives on the Line due to poor track condition. As an example, Metals switch was out of service for six months due to vegetation growth. During that time Metals did not receive any rail deliveries. However, the facility remained in operation. Once Metals cleared the over growth of vegetation, CSXT was able to begin delivering rail cars again.

Because of the decrease in traffic on the Line, Metals and Industries are only served one day per week. Industries only receives inbound loads. Metals receives empty gondolas to load with scrap metal to ship outbound.

VERIFICATION

I, Frankie Allen, declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this Verified Statement. Executed this 20th day of April 2006.

EXHIBIT H–VERIFIED STATEMENT OF MS. PRESLAR

DOCKET NO. AB-55 (Sub-No. 664X)

CSX TRANSPORTATION, INC.–ABANDONMENT EXEMPTION–
IN ANDERSON COUNTY, SC

VERIFIED STATEMENT OF ELLEN M. PRESLAR

My name is Ellen M. Preslar, and I am Manager Regulatory Costing for CSX Transportation, Inc. (CSXT). My business address is 500 Water Street (J200), Jacksonville, Florida 32202. I have been employed by CSXT and its predecessors since June 1978. The responsibilities of my present position include the development and analysis of cost data for regulatory purposes. My educational qualifications include a Bachelor of Arts degree in Mathematics from Jacksonville University and a Master of Business Administration degree from the University of North Florida.

I am familiar with the facts and issues in this proceeding as the Subsection (d) Revenue and Cost Data of the petition filed in this proceeding were compiled, assembled, and prepared under my direction, using the basic information furnished by numerous departments of CSXT. The data submitted in this proceeding were developed in accordance with those rules and regulations as prescribed by the Surface Transportation Board (the Board") and as appear in Title 49, Code of Federal Regulations, Part 1152, Subpart-D.

I have prepared two versions of Exhibit 1. The first version titled "Local Traffic" shows the effect of continuing to operate the Line on CSXT with only the traffic that originates or terminates on the Line. The second version titled "Including Overhead Traffic" shows the effect of continuing to operate the Line on CSXT with overhead traffic that can be rerouted.

The purpose of my statement is to present and explain the revenue and cost data

relative to the proposed abandonment of a 12.74-mile rail line between milepost AKL 26.26, near Belton, the end of the line, and milepost AKL 39.00, near Pelzer, on the Southern Region, Florence Division, Belton Subdivision, in Anderson County, SC (the "Line"). Attached hereto as Exhibit 1 is information which reflects revenue and cost comparisons for the base year of operations, which is the twelve-month period ending December 31, 2005, for the forecast year, which is the twelve-month period beginning April 1, 2006, and for the subsidy year, which is the twelve-month period ending June 30, 2007, in accordance with the regulations of the Board.

Exhibit 1 presents base year, forecast year and subsidy year revenues and expenses related to the Line. Pro forma revenues and expenses for the forecast year beginning July 1, 2006 are based on operations similar to the base year period. The "forecast year" period is defined in Title 49, Code of Federal Regulations, Section 1152.2(h) as "...the 12-month period, beginning with the first day of the month in which the application is filed with the Commission, for which future revenues and costs are estimated."

The traffic increase of 16 carloads projected for the Forecast Year and Base Year is based on annualizing traffic originated by Belton Metals ("Metals"). Metals originated 16 carloads of scrap metal in 2005. During six months of 2005 the switch track to Metals (which Metals is responsible for maintaining) was overgrown with vegetation, which made it impossible for CSXT to serve Metals during those six months. Metals has removed the vegetation obstruction on the switch track so that CSXT can serve Metals' facility. Therefore, being conservative in my traffic estimate, I doubled the traffic originated by Metals in 2005 over six months to 32 carloads in the Forecast Year and the Base Year.

For local traffic only, CSXT would incur (1) an avoidable loss of $118,717 in the Base Year, (2) an avoidable loss of $108,013 in the Forecast Year along with an opportunity cost of $43,188, and (3) an avoidable loss of $108,101 in the Subsidy Year, along with an opportunity cost of $43,188, and a rehabilitation cost of at least $915,960. Including overhead traffic that can be rerouted, there would be (1) a gain of $124,868 in the Base Year, (2) a gain of $150,071 in the Forecast Year along with an opportunity cost of $44,002, and (3) a gain of $148,062 in the Subsidy Year, along with an opportunity cost of $44,001, and a rehabilitation cost of at least $915,960.

In the following pages, I shall provide a further explanation of the underlying components of the Forecast Year. Included as an attachment to this document are copies of (a) the workpapers used in my study and (b) CSXT's 2004 unit cost notebook, developed under my direction.

REVENUES ATTRIBUTABLE

The customers on the Line are Metals and Belton Industries, Inc. ("Industries"). In 2005 Metals originated 16 carloads of scrap metal on the Line and Industries received 70 carloads of Polypropylene and shipped one carload of Polypropylene.

A total of 32 originating carloads of scrap metal (as explained above), one originating carload of Polypropylene, and 70 carloads of terminating Polypropylene are included in the Forecast Year period. The Forecast Year carloads are considered to have traffic characteristics similar to the carloads in the Base Year. The freight revenues for local traffic amount to $215,868 for the 103 carloads in the Forecast Year period. Intra-plant switch revenues and track lease revenues amount to $16,401 in Other Revenue and Income. Additional details on Forecast Year revenue calculations are available in my

workpapers.

A total of 889 carloads in overhead traffic were interchanged to Pickens Railway Company ("Pickens") in Belton Yard. The Forecast Year carloads are considered to have traffic characteristics similar to the carloads in the Base Year. The freight revenues for overhead traffic amount to $1,496,831 for the 889 overhead carloads in the Forecast Year period.

AVOIDABLE COSTS - ON BRANCH

The category known as AVOIDABLE COSTS is comprised of detailed "on-branch costs" and general "off-branch costs." The on-branch costs are those costs associated with the operations on the line segment at issue, including operations considered overhead to the segment, but required to provide service on the segment. The basis for the computation of these costs is set forth in Section 1152.32 of Title 49, Code of Federal Regulations. These costs are delineated into subgroupings which reflect all operating costs associated with moving shipments over the line.

Operating statistics for the forecast year period have been based on actual base year operations over the line segment. The number of trips and locomotives, and average time on branch and related crew wages were determined for calendar year 2005, based on three trips per week to provide interchange with Pickens. For local traffic only, the assumption has been made that service would require one trip per week.

The operations necessary to provide service to the Line are detailed in Mr. Allen's verified statement. The type of locomotive used in the development of forecast year costs is indicative of the type of locomotive actually used to serve the Line during the Base Year period.

On-branch car day costs for the Base Year period are based on actual days spent on the line segment at issue, as retrieved from CSXT's computerized database of statistics. Base Year car days, are used as a reasonable projection for the Forecast Year period. Also, car ownership in the Forecast Year is developed from car ownership trends in the base year period.

On-branch unit costs are developed from the 2004 CSXT Annual Report R-1 data for all periods. Off-branch unit costs are based on the Uniform Railroad Costing System (URCS) data for CSXT, year 2004, for all periods. These costs are the most current costs available to CSXT. The unit costs are indexed to reflect the expected cost levels for the forecast year and subsidy year periods. Supporting details for the unit cost development, their application to the statistics, and the indices are available in my workpapers.

Maintenance of Way and Structures:

The forecast year maintenance is composed of average annual expenditure of $5,000 per mile (a total of $63,800 for 12.74 miles) for operating and capital maintenance needs plus at least $915,960 to rehabilitate the Line to FRA Class 1 standards. Supporting detail for the rehabilitation can be found in Mr. Hunnicutt's verified statement.

Maintenance of Equipment – Locomotive. The appropriate calculations are included in my workpapers.

Transportation. The appropriate calculations are included in my workpapers.

Freight Car Costs (other than Return on Value). The appropriate calculations are included in my workpapers.

Return on Value - Freight Cars. The appropriate calculations are included in my

workpapers.

Return on Value – Locomotives. The appropriate calculations are included in my workpapers.

Overhead Movement. The appropriate calculations are included in my workpapers.

AVOIDABLE COSTS - OFF BRANCH

As the name suggests, "off-branch costs" are those costs incurred by CSXT on its other lines in transporting rail shipments to and from the Line. The off-branch costs reflect the costs by car type, weight and distance to/from a CSXT destination, origin, or interchange point not located on the branch line. Computation of off-branch costs is in accordance with procedures contained in Section 1152.32(n) of Title 49, Code of Federal Regulations.

In order to compute the off-branch costs associated with forecast movements to and from the Line, all traffic is grouped into specific car types and weights. In general, the unit costs used to compute off-branch costs (excluding freight car costs) result from the application of the 2004 URCS formula, which is used in determining rail freight service costs, to the data contained in the railroad's Annual Report R-1, which is filed with this Board. These off-branch costs are indexed to the forecast year period.

Freight car costs are not computed on the basis of URCS. Instead, the same unit costs are used for both on-branch and off-branch freight car costs with one exception. The off-branch return on value for freight cars is developed using the 2004 real cost of capital at 11.7 percent which avoids the need for developing holding gains. Details supporting the development of the unit costs per car are available in my workpapers.

These unit costs are then applied to URCS-related off-branch statistics as if they were URCS-developed unit costs. Freight car costs have been developed at the 2004 level and are indexed to the forecast year period.

In computing the off-branch costs in this proceeding, I followed each of the steps outlined in Section 1152.32(n). The off-branch miles have been adjusted to avoid a double count of costs related to the overhead train movement required to reach the line segment at issue, as noted above. In addition, I have made adjustments to reflect the efficiencies of moving multiple-car and train-load/unit-train shipments. Likewise, I have included a make-whole adjustment to reflect the inefficiencies of transporting single carload shipments. The adjustments are generally accepted in costing, based on adjustments found valid in *Investigation of Railroad Freight Rate Structure - Coal*, Ex Parte No. 270 (Sub-No. 4), decision served March 14, 1975, and have been approved in a joint decision embracing *Cost Recovery Percentage*, ICC Ex Parte No. 399, and *Review of the General Purpose Costing System*, ICC Ex Parte No. 431 (Sub-No. 2) (ICC served March 1, 1993).

In a prior CSXT abandonment application, ICC Docket No. AB-55 (Sub-No. 389), *CSX Transportation, Inc. -- Abandonment Between Dayton and Arcanum -- In Darke, Preble, and Montgomery Counties, OH*, filed July 31, 1991, samples of the off-branch cost computations were attached as Appendices 2A, 2B, and 2C. These samples showed how a value for off-branch cost is calculated by URCS Phase III, with adjustments for modified terminal, freight car costs, and make-whole factors. Also, a copy of the manual process through which costs may be calculated and the results of a mainframe computer program were shown to agree with each other and with the URCS

Phase III costs with adjustments. The mainframe computer program is CSXT's predominant method for calculation of historical off-branch costs. The manual method is used when the carloads are hypothetical. Appendix 2A demonstrated a single carload interline movement in railroad equipment. Appendix 2B presented a multiple car shipment in railroad equipment with routing local to CSXT. Appendix 2C showed the same movement as Appendix 2B except that the equipment was privately owned. The off-branch cost methodology used in the development of costs in that filing is applicable here; however, the 2004 URCS was used to cost the year 2005 movements. My workpapers include a manual check of the computer program's calculation in this study.

RETURN ON VALUE

The return on value calculation was made as follows. The investment base is comprised of (1) working capital based on 15 days' worth of on-branch costs in the forecast year excluding depreciation and return on value, (2) income tax consequences as described below, and (3) net liquidation value for track assets plus land value (as furnished by CSX Real Property). The income tax consequences are developed by applying the statutory tax rate of 38 percent (federal plus an allowance for state, as provided by CSXT's Tax Department) to the net amount of the track and land values. Total valuation of property (investment base) is $418,409 (for local traffic in the Forecast Year) and $423,862 (including overhead traffic in the Forecast Year). The difference is caused by the amount of working capital required.

The 2004 nominal cost of capital of 14.9 percent is applied to the total investment base. The net liquidation value is adjusted for a holding gain projected to occur in the forecast year. In calculating holding gains, CSXT has used a figure of 3.2 percent,

developed using an applicable annual GDP implicit price deflator. Total Return on Value is $43,188 (for local traffic in the Forecast Year) and $44,002 (including overhead traffic in the Forecast Year).

In conclusion, Exhibit 1, attached hereto, demonstrates that the continued operation of the Line constitutes a burden upon interstate commerce. In turn, this situation contributes to the revenue inadequacy of CSXT.

As the predecessor of this Board has recognized, the Staggers Rail Act established as one of its principal goals the achievement of revenue adequacy in the rail industry. One should note that in this Board's decision in *Railroad Cost of Capital — 2004*, STB Ex Parte No. 558 (Sub-No. 8) (STB served June 30, 2005), the current nominal after-tax cost of capital for 2004 was found to be 10.1 percent. As shown in *Railroad Revenue Adequacy - 2004 Determination*, Ex Parte No. 552 (Sub-No. 9), (STB served November 23, 2005), CSXT's comparable rate of return was found to be 4.43 percent. CSXT only achieved 43.9 percent of the 10.1 percent yardstick that the Board has used to determine revenue adequacy. Thus, during 2004, CSXT was revenue inadequate. When the Board issues its 2005 Revenue Adequacy decision, CSXT expects to be recognized as revenue inadequate once again.

Obviously, CSXT must be permitted to better utilize its plant in order to recover the cost of providing rail service, which includes a profit equal to that which is available from alternative investments exhibiting similar risks. Therefore, I urge the Board to exempt the abandonment so that sorely needed capital can be released from this operation and be reinvested elsewhere to help provide a more profitable, sound transportation system.

VERIFICATION

I, Ellen M. Preslar, declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this Verified Statement. Executed this 26th day of April 2006.

CSX Transportation, Inc.
Line Segment: Belton to Pelzer, SC

Notes to Exhibit 1:

	Base Year	The year 2005 has been used for the base year. The majority of PKHP traffic currently moving over the segment at issue can be rerouted via NS. CSXT-served patrons at Belton may potentially be served by PKHP in the future.
Line 1	Freight Revenues	Base year = total CSXT waybill revenues; Forecast year or Subsidy year = Base year revenues with potential RCAF increases and annualization of Belton Metals traffic count. The 2005 traffic count for Belton Metals reflects resumption of service at the end of June following a period of rail inactivity.
Line 3	All Other Revenue and Income	Intra-plant switching revenue; track lease for storage.
Line 5	Avoidable On-branch Costs	Costs for base year are based on year 2004 unit costs indexed to year 2005 level. The forecast year and subsidy year costs reflect same data with indexing to the appropriate periods. Statistics used for calculation of on-branch costs are based on actual number of trips that would be affected by crew start or overtime savings. Estimate of average on-branch service time is based on train speed limits plus estimated service time; one local locomotive (actually mother / slug combination), and 2-man crew. Taxi savings have also been included. "Overhead" costs reflect costs related to crew and locomotive between mileposts AKL 50 and AKL 39 (cutpoint).
Line 5a	Maintenance of Way & Structures	Annual maintenance and inspection costs at $5K per mile (12.74 miles).
Lines 5g & 5i	On-branch Car Costs	Standard on-branch car cost calculation using year 2004 unit costs, indexed to the appropriate periods.
Line 5k	Property Taxes	These costs have been included since they were a "deal breaker" in the shortline negotiations.
Line 6	Off-branch Costs	CSXT 2004 URCS indexed to the appropriate periods. Off-branch costs have been adjusted to avoid double count of costs associated with "overhead" movement included in line 5f.
Line 8	Rehabilitation (Subsidy Year Only)	In the near future, a rehab project will be required to replace ties in order to maintain the line segment at issue to FRA Class 1 standards. The Engineering Department estimates a range between $915,960 and $1,068,840 will be needed to complete this tie work. The analysis uses the lower end of the range.
Line 12	Valuation of Property	The net liquidation value is based on land value of $213,438 for fee parcels only, plus track value estimate of $385,145 for salvage of track materials. Income tax consequences are calculated at 38% on the NLV for scrap or sale value.

CSX Transportation, Inc.
Line Segment: Belton to Pelzer, SC

Notes to Exhibit 1:

	Base Year	The year 2005 has been used for the base year. The majority of PKHP traffic currently moving over the segment at issue can be rerouted via NS. CSXT-served patrons at Belton may potentially be served by PKHP in the future.
Line 1	Freight Revenues	Base year = total CSXT waybill revenues; Forecast year or Subsidy year = Base year revenues with potential RCAF increases and annualization of Belton Metals traffic count. The 2005 traffic count for Belton Metals reflects resumption of service at the end of June following a period of rail inactivity.
Line 3	All Other Revenue and Income	Intra-plant switching revenue; track lease for storage.
Line 5	Avoidable On-branch Costs	Costs for base year are based on year 2004 unit costs indexed to year 2005 level. The forecast year and subsidy year costs reflect same data with indexing to the appropriate periods. Statistics used for calculation of on-branch costs are based on actual number of trips that would be affected by crew start or overtime savings. Estimate of average on-branch service time is based on train speed limits plus estimated service time; one local locomotive (actually mother / slug combination), and 2-man crew. Taxi savings have also been included. "Overhead" costs reflect costs related to crew and locomotive between mileposts AKL 50 and AKL 39 (cutpoint).
Line 5a	Maintenance of Way & Structures	Annual maintenance and inspection costs at $5K per mile (12.74 miles).
Lines 5g & 5i	On-branch Car Costs	Standard on-branch car cost calculation using year 2004 unit costs, indexed to the appropriate periods.
Line 5k	Property Taxes	These costs have been included since they were a "deal breaker" in the shortline negotiations.
Line 6	Off-branch Costs	CSXT 2004 URCS indexed to the appropriate periods. Off-branch costs have been adjusted to avoid double count of costs associated with "overhead" movement included in line 5f.
Line 8	Rehabilitation (Subsidy Year Only)	In the near future, a rehab project will be required to replace ties in order to maintain the line segment at issue to FRA Class 1 standards. The Engineering Department estimates a range between $915,960 and $1,068,840 will be needed to complete this tie work. The analysis uses the lower end of the range.
Line 12	Valuation of Property	The net liquidation value is based on land value of $213,438 for fee parcels only, plus track value estimate of $385,145 for salvage of track materials. Income tax consequences are calculated at 38% on the NLV for scrap or sale value.

Notes to Database

Adj Rev: The CSX database did not separate all junction settlement revenue for PKHP and / or other shortlines in the route. Therefore, revenue for some moves has been adjusted.

O/H Mileage Adj : To avoid any double counting of loco and crew costs on segment of line that is overhead to branch.
= - Off-Br Adj Miles * (LH_A + LH_E + LH_ALLOC1 * (LH_C + LH_D))

O/H Ton-Mile Adj : To avoid any double counting of loco and crew costs on segment of line that is overhead to branch.
= - Off-Br Adj Miles * (LH_B + LH_ALLOC2 * (LH_C + LH_D))

GTM Add-back (Adj):
= - Off-Br Adj Miles * ((Avg ERR * Avg Tare * GTM D-1 Add-back Unit Cost) + Tons * GTM D-1 Add-back Unit Cost)

GTM D-1 Add-back Unit Cost: URCS CSX 2004, Worktable D8, Parts 6 and 7A

NLV Breakdown

		per mile
Sections of Rail per mile	132 each	132
Joint Bars per section	1 pair	132
Ties per section	24 each	3,168
Plates per tie	2 each	6,336

Rail Conversion Calculation

Linear Feet of Rail per Track Mile = 2 x 5280 10,560

(Linear Feet / 3) x Weight of Rail = LBS of Rail
LBS of Rail / 2,000 = Net Tons of Rail

Example:

Track Miles	1	
Linear Feet	10,560	
Weight of Rail (lbs)	100	
Gross Tons of Rail =	176.00	per Track Mile @100 #

Per Len Whitehead (e-mail to HDB, 9/29/04)

"... a gross ton is 2240 lbs (industry standard) is used when selling scrap, the net ton 2000 lbs is used by second hand track material companies. The only difference would be when figuring track material use 2000 lbs. Lineal feet to net ton is total feet divided by three, times rail weight = lbs, divided by 2000 = net ton."
